The five-step chain, with two review columns

One sheet per risk and opportunity pair, or one column each. Both review rows are filled before the management review, not after the audit. "None, by decision" is an allowed action.

Process: _____ Owner: _____ Date: _____

	Risk	Opportunity
Determined specific enough that two people would agree		
Analyzed and evaluated how likely, how big, how much it matters		
Action proportionate; "none, by decision" is allowed		
Built in where in the process the action lives		
Reviewed for effect date, what was checked, what was found, what was decided
